

# Concentric

## Expanding Shaft

### Concentric rolls with a smooth running core

Perfectly precise expansion and contraction along the entire length of the shaft is achieved with mechanical actuation of the leafs or lugs. The Converttech Concentric shaft is a bladderless shaft which will ensure concentric rotation of the core ID every time. Available in diameters from 70 MM to 6 inches and face lengths up to 150 inches Converttech's Concentric shaft is the perfect choice for custom applications which require high precision and exceptional roll concentricity.

### Concentric Shafts:

- 70 MM to 6" diameters
- Face lengths to 150"
- Adapters available to 16" diameter
- Specific designs for wide and narrow web shafts
- Pneumatic/mechanical, pneumatic or mechanical designs assure concentric rotation of core ID
- Lug and Leaf style shafts available
- Suitable for vacuum applications
