

Lateral Motion

Expanding Shaft

Precision Lateral Control

Dramatically reduce roll waste with precision on-the-fly roll control. Well-suited to inspection machines, collators, and printing presses Converttech's Lateral motion shaft can improve roll concentricity for light loads and webs under 20 inches. Simple to use Converttech's Lateral motion shaft is controlled with an easy-to-use mechanical crank which controls the shaft's lateral motion in a 1

inch range of lateral movement. Available in diameters from 70mm to 16 inches and face lengths

Lateral Motion Shafts:

- 70 MM to 16" diameters
- Face lengths to 20"
- Leaf or Continuous Lug styles available
- 1" range of lateral movement
- For cantilevered applications
