

Through Shaft

Expanding Shaft

A lightweight alternative to conventional shafts

When shaft weight is a primary concern Convertech Through shafts are a perfect alternative to heavier, conventional expanding shafts. Able to easily mount all common core chuck diameters Convertech Through shafts are available in aluminum, composite carbon fiber, and steel. This innovative shaft incorporates multiple fittings and coiled hoses to offer a single point of pneumatic inflation to ease loading and unloading for operators. Convertech Through shafts are available in face lengths up to 150 inches and are delivered in just few weeks.

Through Shafts:

- All chuck diameters can be mounted on shaft
- Face lengths to 150"
- Aluminum, Steel, or Carbon Fiber bodies
- Lightweight alternative to run large diameter cores
